

# **CF589 – Equipping For Leadership**

## **INTRODUCTION**

A Biblical leader is a person with a God-given capacity and a God-given responsibility to influence a specific group of God's people toward His purposes. This course will take the student through twelve lessons created to equip you for Leadership.

Researchers studying leadership have long sought the essence of leadership behavior. While there is no general consensus, for the sake of our focus and discussion, eight major strategies of leadership will be presented in this course, based on the life of the great Old Testament leader, Nehemiah. Some have called these strategies, others have called them themes, and others have called them areas of competency. Whatever their label, these eight strategies are found in all effective leaders.

**Learn more by purchasing the entire course that covers the following topics:**
